

CUBE MODULAR HOMES ENVIRONMENTAL MANAGEMENT POLICY

Cube Modular Homes is proud of its environmental reputation and is committed to protecting the biodiversity of Australia's natural environment through implementing this Environmental Management Policy into business planning and operational processes.

Environmental management is recognised as an important responsibility by Cube Modular Homes.

Cube Modular Homes will:

- Ensure our operations comply with all relevant regulatory and Client requirements;
- Abide by the waste reduction principles of reduce, reuse & recycle wherever practicable;
- Develop and maintain a positive environmental stewardship culture in our staff, subcontractors and suppliers;
- Implement a waste management plan for all aspects of fabrication;
- Ensure that employees are trained in environmental matters and encourage them to operate in a responsible manner; and
- Continuously review our energy, water and other raw material usage throughout the year and seek to improve our performance.

Cube Modular Homes will commit the necessary resources to ensure the effectiveness of this policy.

This policy, its intent and each person's responsibility will be communicated to employees, contractors and subcontractors. All are required to comply with the processes, procedures and systems of work developed in accordance with this policy.

Dan Cornwell – Managing Director

Cube Modular Homes
